E-mail: yanchuk1954@gmail.com

The problem of finding theoretical and empirical grounds for integrating psychological knowledge in the context of cultural-dialogic interdeterministic metatheory is presented. The idea of four-dimensional continuity of psychological phenomenology is grounded, the system-forming universal basis of which is culture in the aspect of the psychic reality cultural construction.. Hetero-qualitative, multidimensional and multi-paradigm psychological knowledge is represented in the form of three four-dimensional continuums. In accordance with the introduced principle of cultural-dialogic interdeterminism, the interdeterministic character of the interaction of the constituent structural elements. Theoretical and empirical substantiations of innovative approach are given.

Keywords: cultural constructivism; cultural-scientific tradition; culture; dialogical intertermination; heterogeneous system; integration; metatheory; methodology; principle of cultural-dialogical interdeterminism; cultural-dialogical interdeterminist approach; four-dimensional continuums of psychological phenomenology.
